

**The learning team at Surgeons' Hall museums are pleased to offer a free live online version of their History of medicine (Secondary) and Surgery in the past (Primary) workshops.**

The students explore the exciting developments that have occurred in medicine over the last 500 years, including the discovery of anaesthetics and antiseptics. This online version uses the museum's objects to look at the procedures performed by surgeons in the past, including amputation without pain relief!

Also, you have the option to view selected human specimens of a trephined (drilled hole) human skull and an amputated foot with gangrene.

**To make an enquiry contact Carl Ronan on [c.ronan@rcsed.ac.uk](mailto:c.ronan@rcsed.ac.uk) or phone 0131 527 1650**
